

RESTAURANT DIVIDERS

DESCRIPTION OF PRODUCT:

Help your customers stay safe by putting a restaurant divider between their tables in the dining room. The divider can help **fight against the transfer of microorganisms, particulates and fluids** to minimize the potential for personnel contamination. This protective restaurant divider is lightweight, sturdy, and **can be placed in various different areas**, like in the lobby where your clients are waiting for a table or anywhere there is a need for it. These dividers, along with social distancing and other methods, should allow for restaurants to open sooner, rather than later. **For more information, please visit lakeeriegraphics.com/covid-recovery.**
